PROJECTS

SEJI — *Front/Back end*

Website for a videography company. Macro and Micro UI/UX designs.

VENIROE — *Front/Back end*

Website for a jewelry shop. Macro and Micro UI/UX designs.

Supreme Drop Bot — *Front/Back end*

Designed UI/UX. Developed a robust and versatile query searching algorithm.

Web Testing/ Crawling — *Back end*

Utilized google's puppeteer and optimized its settings/cookies to mimic a human.

Video Sync/Chat App — *Front/Back end*

Uses Firebase to store chat data. Uses socketio to sync user inputs on a html video. Syncs Youtube/Vimeo/mp4 links.

Imgur Viewer — *Front/Back end*

Designed the front end that displays images from Imgur API based on subreddit. Features a basic id and password login system utilizing sqlite3.

Sudoku Solver — *Back end*

Designed an algorithm that solves a sudoku puzzle. Utilizes a non-bruteforce method.

Playlist downloader — *Front/Back end*

Utilizes a youtube downloader and a link to a youtube playlist to download the entire playlist into the users designated folder.
